

Using PowerPoint to Enhance Teaching & Learning

Wednesday, June 28, 2006

1:30 - 4:30

Cofrin 108

PowerPoint is a valuable presentation tool at conferences, in classrooms, in meetings, and in many other venues. Unfortunately, many of these presentations are poorly-designed, and are often presented in ways that detract from the learning experience. Attend this workshop and learn what makes a good PowerPoint presentation. After discussing effective PowerPoint design, Jay Cook, Software Support Specialist, will talk about how to integrate PowerPoint into lectures to enhance the teaching and learning experience.
