GUIDELINES FOR RESEARCH PROJECT (30% OF FINAL GRADE)

1. Due Wednesday, May 4th.

2. 10 to 12 double-spaced, typed pages printed on one side of page.

3. The research project proposal which was approved by the course instructor is to be included with the final project paper.

4. Oral presentations on the research project have been scheduled for April 11, 13, 18, 20, 27 and May 2. Each presenter will have 15 minutes for his/her presentation and five or ten for questions from the class. Attendance is required at all presentations.

5. At the time of the presentation, the presenter is expected to provide the course instructor with a printed outline of the research project and an annotated bibliography of works consulted. The bibliography is expected to contain a balance between traditional sources and other sources. Both the outline and the annotated bibliography are to be included with the final paper.

6. Each research project will be expected to utilize Walter Prescott Webb and/or John Cawelti and/or Henry Nash Smith’s works as contexts for the research.

7. While documentation can be simplified in the text (author, page), full citations are to be given in the annotated bibliography, of course.
