OIE Review of Discipline Efforts to Assess Student Learning for CEPC Program Review

THEATRE STUDIES

Overview

- Does the discipline/program have a viable assessment plan?
  Theatre Studies is a new program. No previous assessment activity is archived on the OIE web site for Theatre Studies.
- Does the plan include intended student learning outcomes?
  At present, there is no assessment plan. There is, however, a solid program element, i.e. the Capstone Project, upon which to build. I look forward to working with Steve and April to build a complete assessment plan prior to their Year Two Report.
- Does the plan include direct as well as indirect measures of student learning?
  Indirect evidence will be aggregated and made available to Theatre Studies as part of their program review data on the OIE web site.
- Are the sources of evidence for student learning appropriate?
  As a performance-based major, the Capstone Project is an ideal vehicle for assessment of student learning.
- Is data collection and analysis ongoing?
  No.
- Are all program faculty/staff appropriately engaged in assessment?
  I have met with Steve at least three times and April at least twice since the Theatre Studies Program was established.
- Has the program made or proposed changes/improvements (intended to enhance student learning) based on learning outcomes data?
  No.
