Registration Error – Major Restriction

Some courses are restricted to majors or non-majors. This information is located on the Timetable of Courses. Students not meeting a major/non-major restriction on a course will receive a registration error. These pre-requisite errors would require a registration override by the course instructor before a student could reattempt to add the course. Upper Biennium General Studies courses are usually split into two sections - a majors section without a GS designation, and a non-majors section that will fulfill GS requirements. For double majors please see the information on Double Majors within this FAQ.
