

Hello Parents of SNC BOLD campers!

As the campus dietitian for St. Norbert College, I'm here to help in meeting any special dietary needs your camper may have.

I can provide you with a list of the safe foods and snacks we have available for those with food allergies – both items on the general menu and others we can make individually for your camper upon request.

In addition, I'm happy to report that we've recently added an Allergen Friendly Fare station with foods that are free of – and have had no cross-contact with – gluten, peanuts, tree nuts, fish and shellfish. House-made, gluten-free vegan bakery items are available as well.

Interactive menus will be posted to the public about two weeks before camp starts at <http://www.snc.edu/dining/>. Detailed ingredient and allergen information is provided for all menu items.

For some campers, this may be the first time they have eaten lunch in a common environment, and it's understandable that they – and you – might have concerns or questions about the dining experience here. If so, please get in touch with me and let's talk about them; your camper's safety and good nutrition are our priorities!

Thanks,

Melissa DaPra, RD, CD
